

This lockdown has proved to be a blessing in disguise for many aspirants. Online classes are a boon as these provide quality learning in the comfort of your home.

You don't need to sacrifice anything to pursue your IAS dream - neither your present job nor your family.

Our weekdays online class is rightly timed so that you don't need to make any significant change in your present routine. All it takes to realise your IAS dream is to wake up early to attend our classes from 7.30 AM.

We are starting off with GS Indian Economy from 18th May, 2021. The topic holds great significance in all three stages of UPSC - prelims, mains and interview. Also, in order to better comprehend economy based newspaper articles, you need to have a command over the static economic concepts.

Classes will be interactive and every static topic will be linked to the newspaper articles in class itself - one of the highlights of our unique pedagogy.

Faculty

Educrat IAS Academy
